Product lines

Pharmacies

RM Pharma

Barcode point of sale, inventory and expiry control, purchasing, customers and insurance, pharmacist assistant and an owner mobile app.

Physicians' clinics

RM Clinic

Patient records, visits and appointments, e-prescriptions to the patient's pharmacy, lab orders and the RM Doctor app.

Veterinary clinics

RM Vet

Animal and owner records, vaccination schedules with reminders, e-prescriptions to veterinary pharmacies and the RM Vet app.

Medical laboratories

RM Lab

Sample tracking with barcodes, test catalog, results with reference ranges and critical flags, reporting and billing.

Suppliers and distributors

RM Business

Incoming pharmacy orders, scan-based picking, e-invoicing, carton labeling, GPS-guided delivery and promotions.

Complete pharmacy operations in one system

For pharmacies

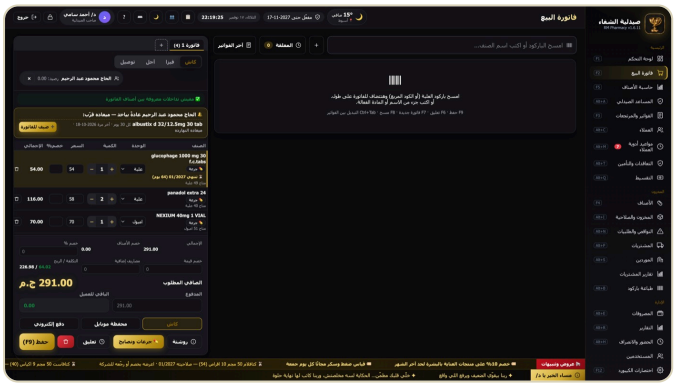

RM Pharma

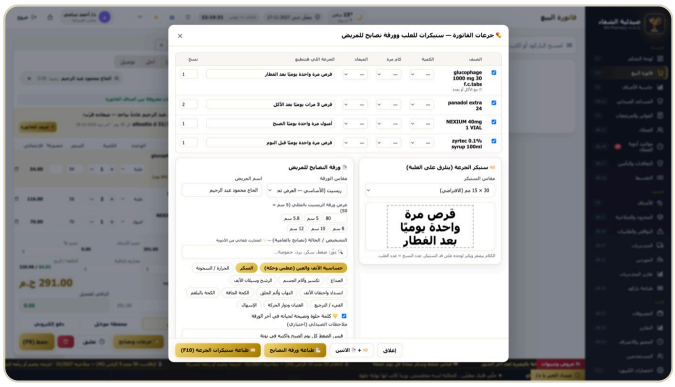

Offline capabilities

- High-speed barcode and DataMatrix checkout with box, strip and tablet pricing
- Batch and expiry-based inventory, shortage alerts and stock counts
- Purchasing with bonuses, discounts and tax; supplier accounts
- Customer credit, insurance contracts and installments; refill reminders
- Dosage labels, patient advice sheets and barcode printing
- Role-based permissions, time and attendance, reporting and daily backup

Online capabilities — Gold and Platinum

- Pharmacist assistant with interaction checks from official FDA labeling
- Lab and imaging report explanations with patient-ready summaries
- Automatic data capture from supplier invoices and ID cards
- Real-time pharmacy monitoring from a mobile device
- Encrypted cloud backup
- Tracked supplier orders and supplier promotions in the offers bar

For physicians' clinics

RM Clinic

- Numbered patient records with drug allergies highlighted at every visit
- Structured visits with vital signs, diagnosis and treatment plan; appointments and follow-ups
- E-prescriptions to the patient's pharmacy with stock visibility, alternatives and FDA interaction alerts
- Prescription designer for A5, A4 and receipt formats
- Lab orders to RM Lab laboratories, with results returned to the patient record
- RM Doctor app: patient code, physician-reviewed data updates and record lock with approval requests

For medical laboratories

RM Lab

- Sample accessioning with a barcode label for every tube
- Test catalog and panels with codes, specimen types and pricing
- Results entry against age- and sex-specific reference ranges, with critical-value flags
- Branded reports in print, PDF or electronic form, with patient summaries
- Electronic orders from RM Clinic physicians; results returned to physician and patient
- Billing, contracts and daily revenue reporting

For veterinary clinics

RM Vet

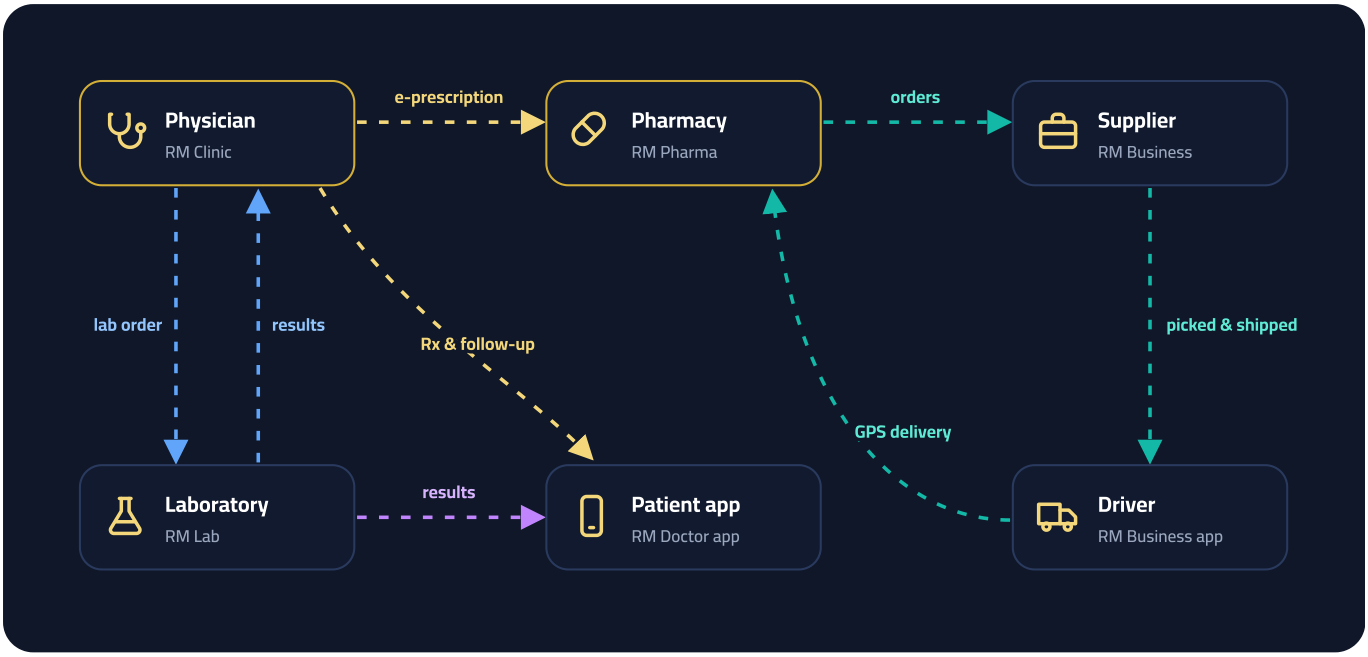

- Animal records with species, breed, weight and microchip
- Owner profiles with all of their animals in one place
- Species-specific vaccination schedules with one-tap WhatsApp reminders
- Weight-based dosing and a veterinary drug catalog for Egypt and Saudi Arabia
- E-prescriptions to veterinary pharmacies and veterinary lab orders
- RM Vet app for the veterinarian and the pet owner

For pharmaceutical companies, warehouses and distributors

RM Business

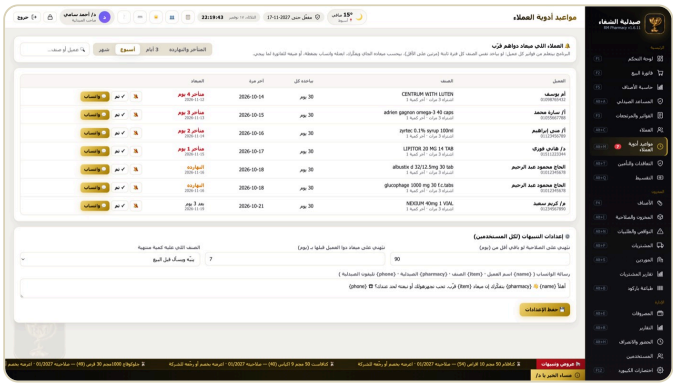

- Automatic order intake from connected pharmacies via invite code
- Scan-based picking with alerts for incorrect or excess items
- E-invoices delivered to the pharmacy instantly
- Barcoded carton labels (Carton 1 of 6)
- Drivers: scan-to-load, GPS route optimization and photo proof of delivery
- Promotions published to every connected pharmacy; role-based staff permissions

A fully connected ecosystem

Veterinary practices operate a dedicated network flow in RM Vet, covering veterinary pharmacies, veterinary lab orders and the RM Vet app for pet owners.
